Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: applicant's representative proposed to amend the claims by adding the limitation "wherein only one end of said at least one pin is secured to the battery housing". This means that one end of the pin is physically secured to the battery housing while the other end is not secured/connected. It was argued that applicant's invention permits to reduce overall width caused by the use of rivets/insulators, and it would eliminate the use of insulators. Paragraph 0014 and Figures 2C & 3 were discussed. In reply to applicant's proposal, the examiner suggested amendatory language such as "wherein only one end of said at least one pin is directly secured to a battery housing recess located at the lower end of a battery housing opening" or similar language as disclosed in paragraph 0033. This would overcome the prior art of record. It was advised that further search is still necessary.
